

*In the effective management of Nephrotoxicity & Glomerular damage, microalbuminuria*

Rx **TAZYTIL**<sup>TM</sup>  
N-Acetylcysteine 150mg + Taurine 500mg Tablets

- Offers Synergistic protective effect of N-acetylcysteine and taurine against cisplatin induced nephrotoxicity.
- Offers increase in GFR (Glomerular Filtration Rate).
- Useful in attenuation UACR and sTGF-B1 levels in microalbuminuric type 2 diabetic patients.
- The benefits of taurine therapy on kidney function and blood pressure are note worthy and may useful in preventing the deterioration of microalbuminuria.
- The combination is more effective than each monotherapy, which clearly points out to their synergistic protective effect.
- The therapeutic effects of combination are largely attributed to their unique cytoprotective actions and their ability to restore the activity of enzymatic antioxidants in renal tissue.
- The nephroprotective effect of NAC and TAU to establish their feasible application as a prophylactic adjunct CDDP therapy also in cancer patients.

As supplement to nephroprotective Drugs., Cisplatin-induced nephrotoxicity., Microalbuminuric type 2 diabetic patients

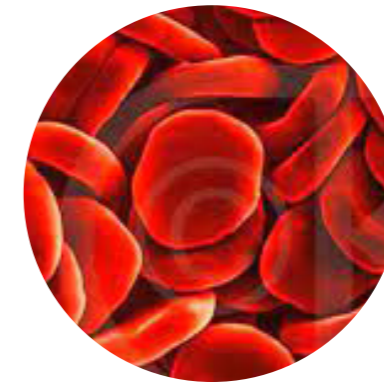

Economical LIPOSOMAL IRON brand Available in Pharma Industry

# Rx Delypo<sup>TM</sup>

Ferric Pyrophosphate Equivalent to Iron 30mg +  
**(LIPOSOMAL IRON)**  
 Vitamin C 50mg + Vitamin B12 0.75 + Folic Acid 300 mcg

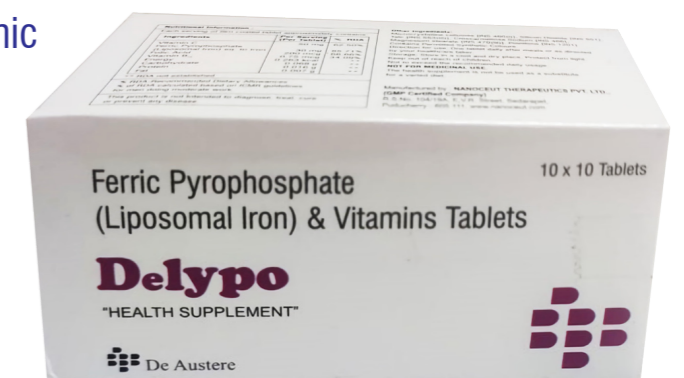

- Iron in the Form of Ferric Pyrophosphate is Microencapsulated in Phospholipid Bilayers to form Liposomal Iron
- Advantages of Liposomal Iron
- Lowest Dose (30 mg), smallest Tablets than all other iron supplements
- Greater Bioavailability
- 3.5 times greater Bioavailability than Free Ferric Pyro phosphate
- 2.7 times greater than Ferrous sulphate
- 4.1 times greater than Ferrous Gluconate Reduces Gastro Intestinal Side effects GI irritation, Nausea, Vomiting
- Prevents Iron Instability in GI tract
- Directly absorbed into the intestine

**Availability**

Ferric pyrophosphate liposomal iron eq to iron 30 mg + vitamin c 50 mg  
 Vitamin B12 0.75mcg Folic acid 200mcg)  
 Looking forward for your valuable enquiry/orders.

**Indications**

Chemotherapy related Anemia for Cancer Patients Iron Deficiency Anemia Chronic Kidney Disease related Anemia Celiac disease

**Introducing Unique Chocolate  
flavoured Ferric  
Pyrophosphate combination for  
the first time in India**

**Ensures excellent anemia  
control in patients on dialysis**

Highly effective in increasing hematocrit level in children on dialysis

**R<sub>x</sub> AUSTEFER<sup>TM</sup>**  
**Ferric Pyrophosphate Equivalent to Iron 30mg +  
Vitamin C 50mg + Vitamin B12 0.75 + Folic Acid 300 mcg**

- **Treat or prevent low blood levels of iron (e.g.,  
for anemia or during pregnancy).**
- **Improves regeneration of the intestinal epithelium**
- **Increases the levels of brush border enzymes**
- **Enhances the immune**

## Treatment of Hyperphosphatemia & Iron Deficiency Anemia in Chronic Kidney Disease

# Rx **Fericstar**<sup>TM</sup> *Ferric citrate 210*

- Patients with chronic kidney disease (CKD) frequently have high levels of phosphate and low levels of iron in the blood, both of which are associated with elevated risks of cardiovascular disease and death.
- Fericstar (ferric citrate) has a special formulation that enables it to both **increase iron levels** in patients with CKD who are not receiving dialysis and **decrease phosphate levels** in patients with CKD who are receiving dialysis.

**Excellent Calcium Formula**

Rx **Dealfa**<sup>TM</sup>  
**Alpha Calcitrol**

- Helps in maximum absorption
- Manages hypocalcemia in patient undergoing dialysis for chronic renal failure

*Support the Kidney To Excrete Out Urea*

Rx **DENOLOG**<sup>™</sup>  
Alpha Ketoanalogue Tablets

Essential amino acids maintain the nutritional status

Delays progression of CKD without deteriorating nutritional status

Improve glomerular filtration rate in patients with chronic kidney disease

Decreased mean serum total cholesterol levels

**Indications:**

**Kidney Dysfunction**

**Chronic Kidney Disease**

**Diabetic Nephropathy**

**DENOLOG**<sup>™</sup>  
*Economical Alpha Ketoanalogue Tablets  
Available in Pharma Industry*

### Prebiotic

- Inhibits the growth of harmful bacteria
- Promotes the growth of friendly bacteria

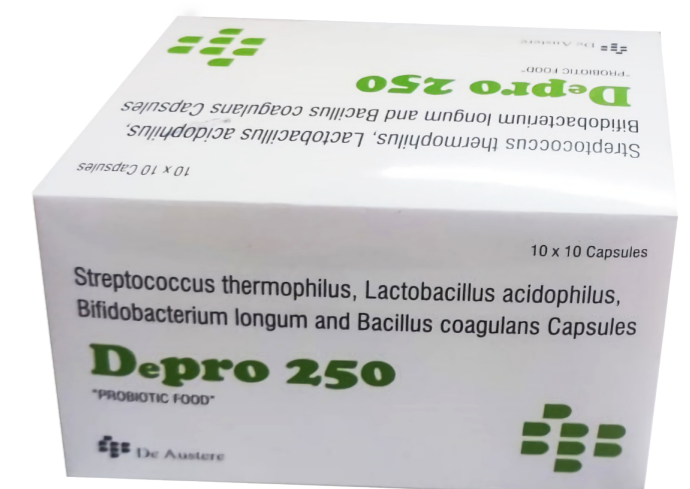

### Probiotic

- Favours the growth of probiotics
- Enhances the value of probiotics

### Improves GI Flora

### Maintains a healthy gut

### Protects from GI related disorders

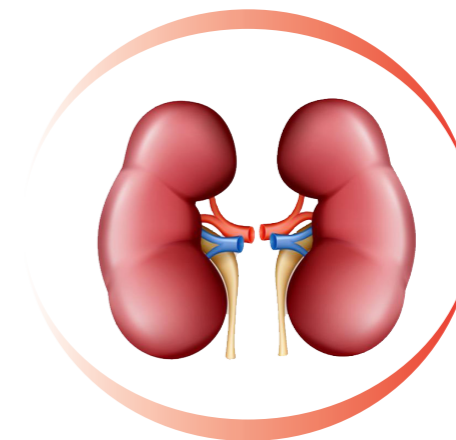

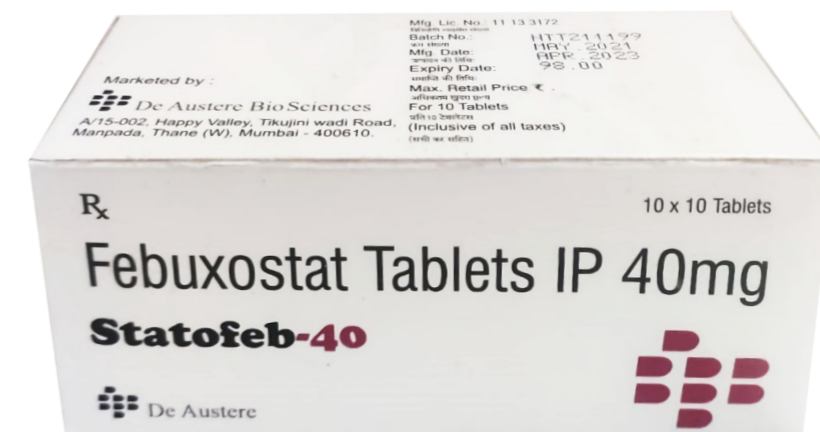

Effectively Managing Uric Acid...

Rx **Statofeb**<sup>TM</sup>  
Febuxostat 40mg / 80mg Tab

- ▶ Helps to prevent gouty attacks
- ▶ Prevents formation of Uric Acid Kidney
- ▶ Stones Inhibits progression of hyperuricemia towards arthritis
- ▶ Ensures patients compliance as providing once daily dosage at anytime
- ▶ No dosage adjustment needed for patients with mild to moderate Kidney problems

Redefine control in type 2 diabetes

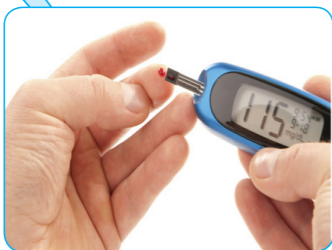

<sup>Rx</sup> **AUSTAMET** <sup>TM</sup> **G1/G2**

Metformin XR 500mg + Glimepiride 1mg / 2mg    Tablets

Greater proportion of Patients achieved HbA 1c target  
with Glimepiride group than with Sitagliptin group<sup>1</sup>

Hydrophilic  
polymer  
matrix  
technology

**Increases significantly  
the ratio between  
C-peptide/Glucose<sup>3</sup>**

For the Management of **Hypertension** & **Edema**  
associated with Congestive **Heart Failure**...

R<sub>x</sub>  
**Detorz**<sup>®</sup>  
Torseamide **20mg**

Induces higher urine excretion than frusemide in cirrhotic ascites

3 times longer half life and 3 times longer diuretic action than frusemide.

Well tolerated in the treatment of sodium and fluid retention resulting from moderate-to-severe CHF

Reduces pulmonary congestion, peripheral edema, ascites, jugular venous pressure and body weight

NEW

A NOVEL INSULIN INDEPENDENT ANTI-DIABETIC WITH CARDIAC SAFETY

Rx **DeSitaD**<sup>TM</sup>  
 Dapagliflozin 10mg +  
 Sitagliptin 100mg  
**Tablets**

■ A HIGHLY POTENT, REVERSIBLE & SELECTIVE SODIUM-GLUCOSE COTRANSPORTER-2 INHIBITOR INDICATED WORLD WIDE FOR THE TREATMENT OF TYPE 2 DIABETES

■ WELL TOLERATED

■ AN ORALLY ADMINISTERED, POTENT & HIGHLY SELECTIVE INHIBITOR OF DIPEPTIDYL PEPTIDASE 4 (DPP-4) AND IS THE FIRST AGENT OF ITS CLASS TO BE APPROVED FOR USE IN THE MANAGEMENT OF ADULTS WITH TYPE 2 DIABETES

The beacon of **HOPE** for Diabetes

# Dapahope<sup>®</sup>

Dapagliflozin 10mg

TABLETS

**ENSURES VICTORY IN  
CONTROLLING  
DIABETES**

- Exerts antihyperglycaemic, cardioprotective and renoprotective properties
- Reduces renal glucose reabsorption by increasing urinary glucose excretion and reducing blood glucose levels
- Reduces body weight and blood pressure (BP) across a broad spectrum of patients
- Reduces SBP and improves glycaemic control in patients with inadequately controlled T2D and hypertension.
- Compared to sitagliptin, Dapagliflozin is significantly more effective at improving cardiometabolic risk factors in overweight patients with early-stage type 2 diabetes
- Slows the progression of the renal and liver fibrosis associated with type 2 diabetes
- Well tolerated agent

To make the heart relax in **HYPERTENSION**

# Benilife

Benedipine 4/8mg

Tablets

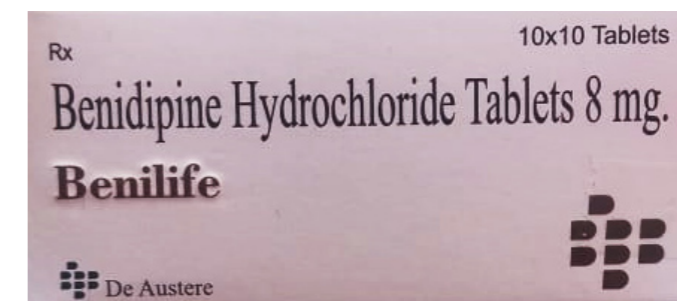

Angina pectoris

Hypertension

- ♥ A Calcium channel blocker.
- ♥ Regulates the blood pressure by relaxing the blood vessels and reducing the pressure.
- ♥ Make easier for the heart to pump more blood throughout the body.
- ♥ Normalizes the blood pressure in patients with high blood pressure.

New and emerging treatment options for  
**Neuropathic** pain from diabetic **Neuropathy**

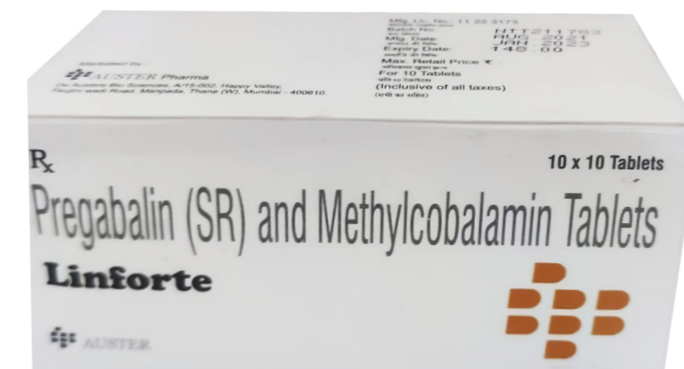

Rx **Linforte**<sup>TM</sup>  
Mecobalamin 1500mcg + Pregabalin 75mg SR

Better response

Better absorption

### More potent successor to gabapentin

- Diabetic Neuropathy and neuralgia
- Post-herpetic neuralgia
- Fibromyalgia

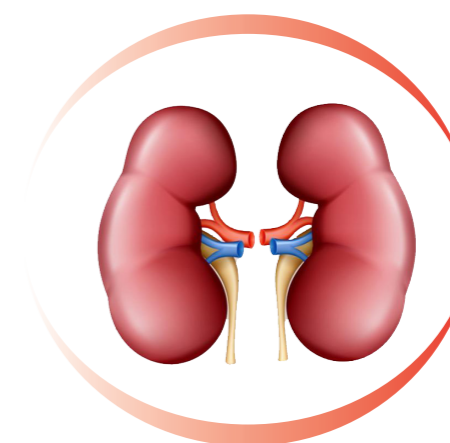

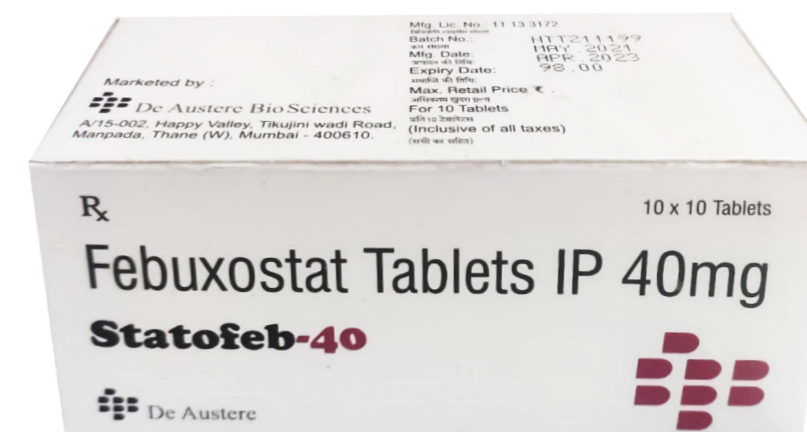

Effectively Managing Uric Acid...

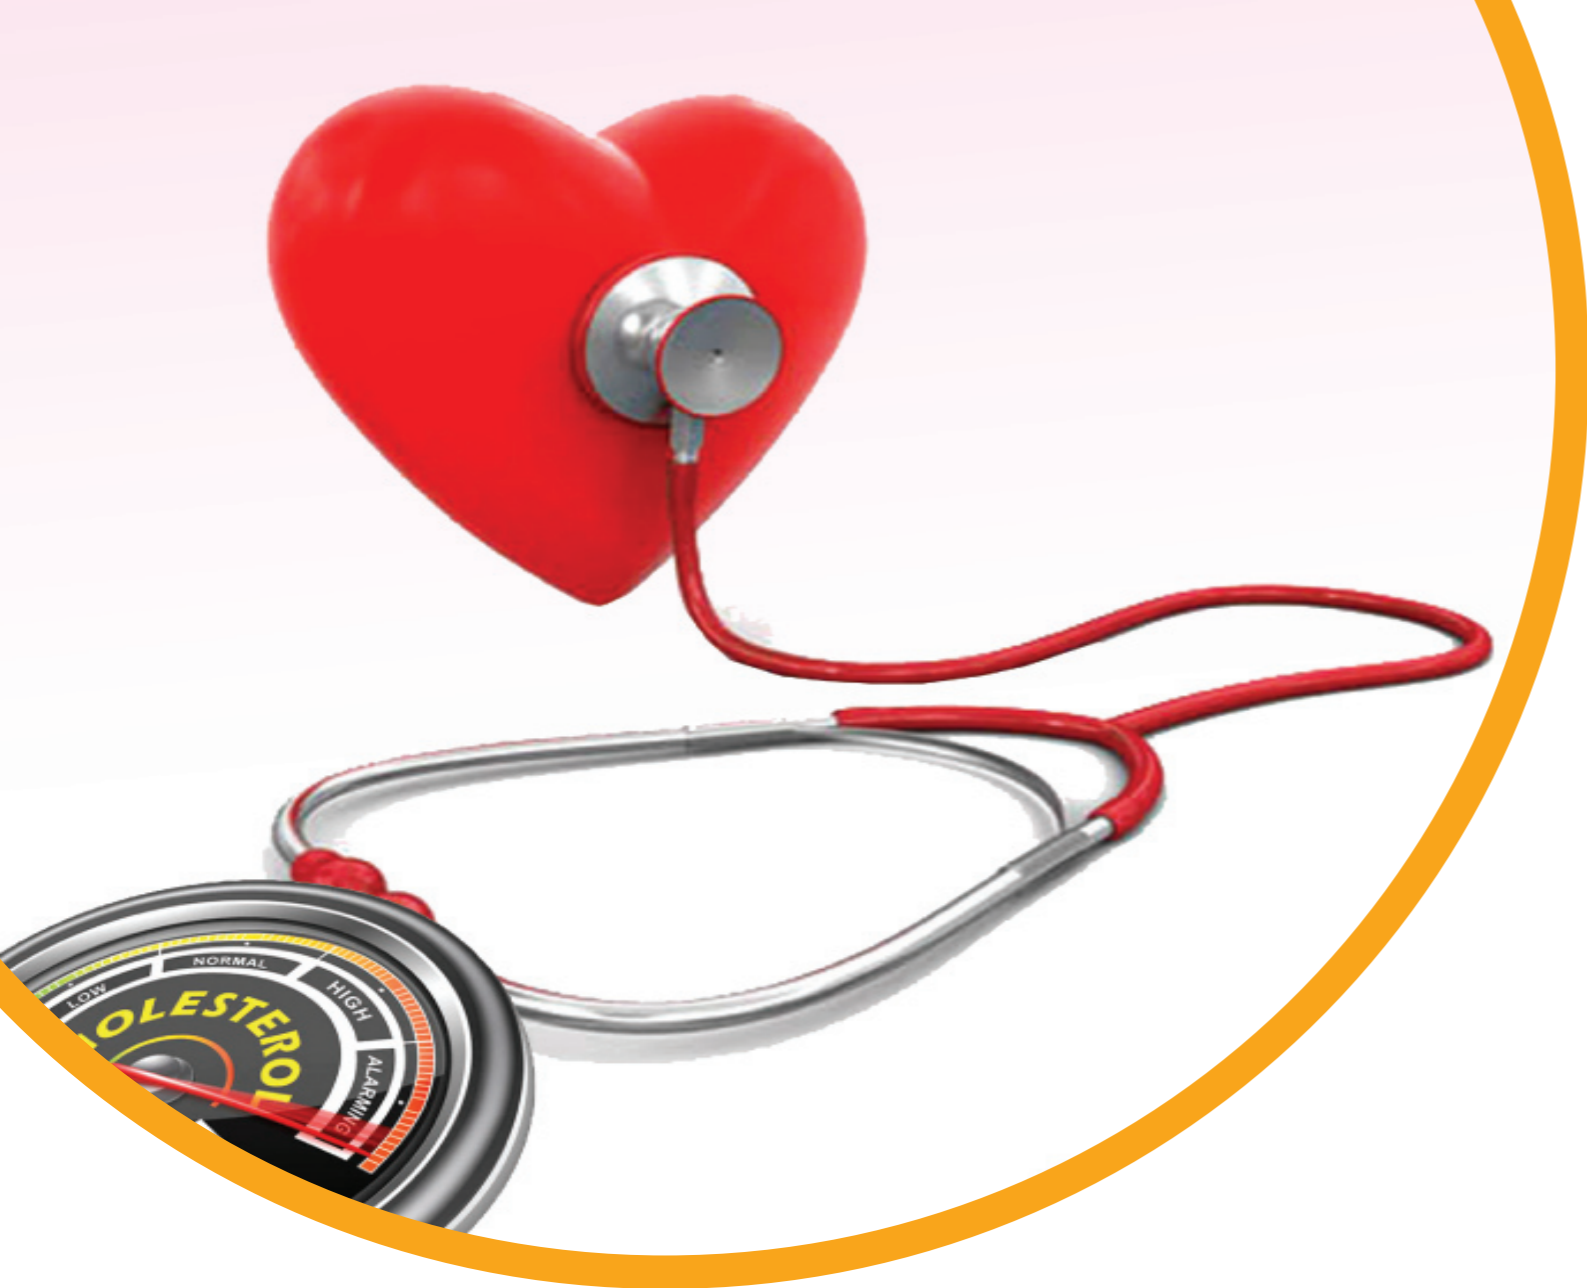

Rx **Statofeb**<sup>TM</sup>  
Febuxostat 40mg / 80mg Tab

- ▶ Helps to prevent gouty attacks
- ▶ Prevents formation of Uric Acid Kidney
- ▶ Stones Inhibits progression of hyperuricemia towards arthritis
- ▶ Ensures patients compliance as providing once daily dosage at anytime
- ▶ No dosage adjustment needed for patients with mild to moderate Kidney problems

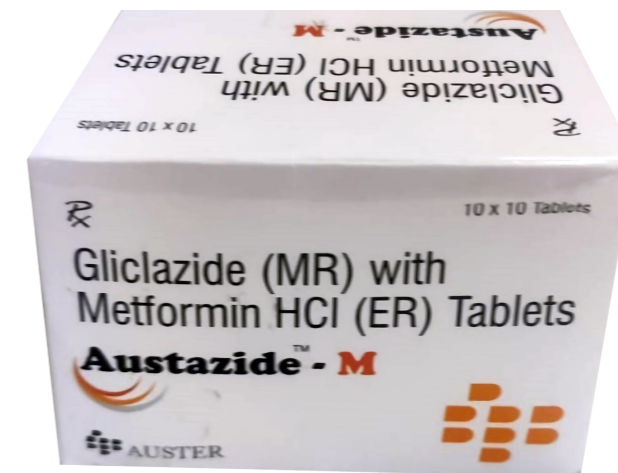

For the long term treatment of Diabetes Mellitus

<sup>Rx</sup> **AUSTAZIDE-M**<sup>TM</sup>  
Metformin Hydrochloride 500mg + Gliclazide 40 /80mg SR Tablets

The combination that matters...

- Lowers FPG and HbA1c
- Significant improvement in Glycemic control
- Significant improvement in plasma glucose level
- Decreases LDL cholesterol
- Potential benefits in terms of improvements in specific lipid abnormalities

In the Management of Dyslipidemia and CV Risk

Rx **austalip**<sup>TM</sup>  
Atorvastatin 10mg/40mg Tablets

## Trusted statin Worldwide

- Completely hails the progression of atherosclerosis in CHD patients
- Significant 36% reduction in CV events in hypertensives with normal levels of cholesterol
- Majority of type 2 diabetes patients attain LDL-C goal with 10mg atorvastatin

**DE AUSTERE**  
Bio Sciences  
WHO-GMP Certified Company

For management of Hypertention/CV risk reduction

<sup>Rx</sup>  
**GAMAtel**<sup>TM</sup>  
Telmisartan 40mg                      Tablets

## Effective Sartan

- ♥ Partial PPAR  $\gamma$  agonist unlike other sartans, thus significantly improves insulin sensitivity, FPG, Hba1c levels and lipid profile
- ♥ Significantly greater BP reduction than ramipin, Losartan and Valasartan during the crucial 6-hours of dosing interval
- ♥ Effective in preventing CVD in high risk patients
- ♥ Significantly reduces BP by 19/7.3 mm Hg in diabetic hypertensives along with improving insulin resistance.
- ♥ Significantly greater improvement in renal function and blood glucose levels than olmesartan or Losartan in diabetic hypertensives

IN ACUTE ALLERGY & INFLAMMATION

<sup>Rx</sup> **Cortichene**<sup>TM</sup>

**Deflazacort 6mg** **Tablets**

**Indications**

- Systemic Lupus Erythematosus (SLE)
- Asthma & Air ways disease
- Nephritic syndrome
- Sarcoidosis
- Rheumatoid Arthritis
- Juvenile Chronic arthritis
- Polymylgia rheumatica
- Transplantation

Deflazacort is delivered from prednisolne

A cortlicosteriod with mainly glucocorticold activity

An anti-inflammatory dose of B mg deflazacort is equal to 5 mgprednilsolone.

Exhibits greater anti-inflammatory potency than prednisolone

*For strong formation*

# Austecal<sup>™</sup>

Calcium Citrate Malate, Vitamin K<sub>2</sub>7 &  
Vitamin D<sub>3</sub> Tablets

- An excellent calcium regulator
- Essential for healthy arteries and strong bones, it also promotes skin, brain and prostate health

- Increase the calcium absorptions
- Low blood levels of calcium may cause bone disease
- Higher bio availability than calcium carbonate
- Vital for foetal development
- Promotes bone mineral density
- Most menopausal women & increase bone density

*Pre-Probiotic Capsule with Maximum Bacterial Spores*

A COMPLETE CARE FOR PCOS

# Rx Allswel<sup>TM</sup>

*N-Acetylcysteine, Astaxanthin, Biotin & D-Chiro Inositol Tablets*

- PCOS
- REPRODUCTIVE DYSFUNCTION
- MENSTRUAL CYCLE IRREGULARITIES
- ANOVULATION
- DECREASED EGG HEALTH & RECURRENT MISCARRIAGE

#### N-ACETYLCYSTEINE

NAC therapy resulted better in improvement in weight, systolic BP, fasting blood glucose, parameters of insulin resistance and lipid profile compare to Metformin. Side effects of Metformin were much higher resulting in non-compliance of treatment. NAC with minimal occasional side effects ensured.

#### L-METHYLFOLATE

Improves Oocyte Quality & Maturity.

#### ELEMENTAL ZINC

Zinc is important for ovulation and to help follicles mature. As well increasing levels of zinc can improve many of the frustrating symptoms women with PCOS experience every day like acne, hair loss, and excessive unwanted hair growth.

#### ELEMENTAL CHROMIUM

Significantly increases the chances of ovulation & regular Menstruation.

#### VITAMIN D3

Normalizes Serum AMH \* (anti-mullerian hormone) levels & Improvement Follicular Development & Ovarian Health
